PROFILE

Full stack developer with 78% of a Computer Science degree completed at PUC Goiás. Experience with React/Next.js and TypeScript interfaces, Java/Spring Boot APIs, authentication, payment/invoicing integrations and automated tests. Seeking junior full stack or internship opportunities.

TECHNOLOGIES

Frontend: React, Angular, Next.js, TypeScript, HTML / CSS

Backend & data: Java, Spring Boot, Python, Flask, NestJS, PostgreSQL / MySQL

Testing & delivery: JUnit, Mockito, Jest, Docker, Git, CI/CD

EXPERIENCE

Full Stack Developer | Freelance | 09/2025 to Current

- Built responsive React/Next.js interfaces and Java/Spring Boot APIs, with JWT authentication and access control.

- For Madrid Auto Center, integrated PagBank, Mercado Pago and Stripe payments, plus Focus NFe for NFS-e invoicing, with Jest tests.

Software Engineer | Futurium LTDA | 03/2023 to 10/2025

- Developed Java plugins with Bukkit/Spigot for Minecraft servers used by hundreds of players, working with event-driven programming and concurrency.

- Worked in a Scrum team, wrote JUnit/Mockito tests and documented internal systems in Confluence.

Systems Analyst - Junior | JOB Investimentos e Participações S/A | 04/2024 to 11/2024

- Created custom ERP reports to support internal operations and decision making.

- Managed ERP access and Active Directory, and supported corporate systems and communications.

IT Intern | JOB Investimentos e Participações S/A | 11/2023 to 04/2024

- Worked with SQL, Oracle and Power BI for data queries and reporting.

- Supported ERP systems, network infrastructure and firewall monitoring with Fortinet.

SELECTED PROJECTS

Studify: Course platform with React/TypeScript, Spring Boot, JWT, PostgreSQL, Liquibase and S3/LocalStack. Fixed a course/learning-path completion bug using tests and logs. View project

FitMeet: SysMap bootcamp team project: social fitness application with React/TypeScript, Spring Boot, PostgreSQL, JUnit/Mockito and Docker. View project

OfixIA: Automotive assistant with Flask, TensorFlow/Keras, a structured technical catalog and Gemini for clear guidance. View project

HelpDesk Flow: Complete ticketing system with Angular, ASP.NET Core, JWT, PostgreSQL, Docker and integration tests. View project
